

Avalon Shale Treatment Facility

LOCATION	Avalon Shale
SCOPE	Gas Treating Services, including inlet filtration, after cooler, dehydrator, power generation and thermal oxidizer
DELIVERY SCHEDULE	180 days
COMPLETION	October 2012
CONTRACT TYPE	Facility rental with installation supervision
HIGHLIGHTS	<p>Spartan installed two modular Amine Facilities, a 200 and 60 GPM plant in four months.</p> <p>The site included all components necessary to treat high BTU gas found in emerging shale plays. This facility included redundant power generation facility to power the plant and a thermal oxidizer to combust the volatile organic compounds (VOCs).</p> <p>Spartan supervised site construction as well as commissioning and start-up activities.</p>
