

Eagle Ford Gas Treatment Facility #1

LOCATION	Eagle Ford Shale
SCOPE	Gas Treating Services, including inlet slug catcher, inlet filtration, after cooler, dehydrator, on site generator and thermal oxidizer
DELIVERY SCHEDULE	90 days
COMPLETION	October 2011
CONTRACT TYPE	Contract Operations with service level guarantee
HIGHLIGHTS	<p>Spartan installed a modular 100 GPM Amine Facility in four weeks.</p> <p>The site included all components necessary to treat high BTU gas found in emerging shale plays. This facility included genset to power the plant and a thermal oxidizer to combust the volatile organic compounds (VOCs).</p> <p>Spartan also operates the facility providing run time guarantees to the end user.</p>
